

Yi Li

Philadelphia, PA | +1 857-313-5686 | ericli192508@gmail.com | linkedin.com/in/yi-lii | 1iiiiii.github.io/macro-report

EDUCATION

University of Pennsylvania

Master's Degree in Applied Economics and Data Science

Philadelphia, PA

Dec 2027 (expected)

Boston University

BA in Economics; BA in Philosophy; Dean's List (all semesters); GPA: 3.73/4.0

Boston, MA

May 2026

- Relevant Coursework: Machine Learning, Time Series, Monetary and Banking Theory, Econometrics

PROFESSIONAL EXPERIENCE

Guorong Securities Co., Ltd.

Fixed Income Intern, Proprietary Trading Department

Beijing, China

Jun 2026 – Aug 2026

- Replicated three sell-side methodologies tracking daily repo balances and market leverage, validated against CFETS data; presented a crowdedness report gauging institutional sentiment and funding fragility to guide desk rates positioning
- Developed a 60+ indicator U.S.–China macro database (live GitHub site) decomposing releases beyond the headline e.g. NFP by sub-industry, revision sources (data vs. seasonal factors), NSA seasonality vs. 5-year norms, and contribution shares
- Initiated an LLM-agent rating workflow adopted desk-wide, completing credit reports for 400+ bonds in two weeks (~8 months of manual work); wrote the SOP and trained 5 colleagues

Mint Finance

Macro Research Analyst Intern

New York, NY

Jun 2025 – Aug 2025

- Built a U.S. housing macro framework linking mortgage rates, affordability, lock-in, and supply to home sales to identify rotation opportunities in homebuilders and building materials
- Constructed rate-sensitivity and event-study models showing a 100 bp mortgage-rate decline lifts existing home sales by ~3.6% over the following year, informing sector allocation
- Integrated BLS, Census, and NAR data into Tableau dashboards; briefed fund partners weekly and delivered a final housing market outlook

RESEARCH EXPERIENCE

Federal Reserve Monetary Policy and Balance Sheet Research

Independent Researcher

Boston University

Jan 2026 – May 2026

- Computed futures-implied probabilities for the Jun 2018 FOMC hike (+25 bp to 1.75–2.00%, >90% priced pre-meeting); flagged the dot-plot shift to four hikes as the key policy signal
- Assessed three balance-sheet reduction paths (currency, TGA, reserves) under Fed and Duffie frameworks; argued the TGA could halve to \$500bn and explained why the ON RRP drains first

A Time Series Analysis of U.S. Housing Starts

Independent Researcher (published in BU's UEA Journal)

Boston University

Sep 2025 – May 2026

- Modeled U.S. housing starts from 1985 to 2025 with ARIMA/ARFIMA and asymmetric GARCH, selecting ARIMA(0,1,1)–GARCH(1,1) to capture volatility clustering and long memory
- Estimated a VAR(4) of starts, construction employment, builder sentiment, and mortgage rates; impulse responses showed rates exogenous and a two-month sentiment lift from employment

LEADERSHIP & TEAMWORK

BU Cross-College Challenge

Technology Consultant

Boston University

Jan 2026 – May 2026

- Led a 5-member team consulting for nonprofit Shelter Music Boston, running client interviews and coordinating deliverables; client adopted the redesigned 4-language survey system

Global Scope Lab, Questrom School of Business

Research Assistant

Boston University

Sep 2023 – Jan 2026

- Spearheaded two lab initiatives, restructuring the research database and relaunching the lab website; planned approaches and delegated tasks across rotating 2–3 person teams

SKILLS & OTHERS

- Languages: Native Chinese, Professional English (TOEFL: 113; GRE: 326, Q170), Elementary Spanish
- Technical: Python, R, Stata, SQL, Tableau, Excel/PowerPoint
- Research Methods: Time-series modeling (VAR, ARIMA/ARFIMA, GARCH), event studies, panel econometrics, macro dashboarding
- Data Platforms: Wind, iFinD, Choice, LSEG, FRED/ALFRED
